A. J. BROWN.....	Dallas

STATION OFFICERS

H. H. HARRINGTON, LL. D., President of the College.

J. W. CARSON.....	Vice Director
M. FRANCIS	Veterinarian
E. J. KYLE.....	Horticulturist
F. R. MARSHALL.....	Animal Husbandry
R. L. BENNETT.....	Cotton Specialist
O. M. BALL.....	Botanist
G. S. FRAPS.....	Chemist
A. F. CONRADI.....	Entomologist
EDWARD C. GREEN.....	Assistant Horticulturist
C. E. SANBORN.....	Co-Operative Entomologist
JOHN C. BURNS.....	Assistant Animal Husbandry
C. O. MOSER.....	Deputy Feed Inspector
M. S. CHURCH.....	Deputy Feed Inspector
W. P. CONNELLY.....	Deputy Feed Inspector
C. W. CRISLER.....	Clerk Feed Control
C. A. POFFENBERGER.....	Chief Clerk
MISS M. H. WATKINS.....	Stenographer

STATE SUB-STATIONS **Beeville, Bee County**

S. A. WASCHKA, Superintendent.....	Troupe, Smith County
W. S. HOTCHKISS, Superintendent.....	Troupe, Smith County

NOTE.—The main station is located on the grounds of the Agricultural and Mechanical College in Brazos County. The Postoffice address is College Station, Texas. Reports and bulletins are sent free upon application to the Director.

[Blank Page in Original Bulletin]

THE FEED CONTROL IN 1905-6.*

J. W. CARSON, Vice-Director.
G. S. FRAPS, Chemist.

The Legislature of 1905 passed a law governing the sale of concentrated feeding stuffs in Texas. This Bulletin reports the work done under this law for the season of 1905-6.

THE FEEDING STUFF LAW.

The following is a summary of the chief provisions of the Texas Feeding Stuff Law. [For full text of the law see pages 15-19.]

The Texas Feeding Stuff Law requires that every package of feeding stuff shall carry a tax tag, and a plainly printed statement showing clearly the number of net pounds of feeding stuff in the package, the name, brand or trade-mark under which the article is sold, the name and address of the manufacturer or importer, the place of manufacture, and a chemical analysis stating the percentages it contains of crude protein and crude fat.

All concentrated feeding stuffs, including wheat bran, corn chops, cotton seed meal, rice hulls, etc., are subject to the requirements of the law. Hay and straw and the whole seeds or grains of wheat, corn, or other whole or unground grains or seeds are not included in this law.

Before selling or offering for sale any concentrated feeding stuffs in this State, the manufacturer, importer, or party who causes it to be sold or offered for sale, must deposit with the Director of the Experiment Station a sealed glass jar or bottle containing not less than one pound of each kind or brand of such feeding stuff. This sealed package is hereafter referred to in this bulletin and in correspondence as the "deposit sample." The sample must be accompanied by an affidavit that it is a fair average sample of the feeding stuff to be sold or offered for sale and that it corresponds within reasonable limits to the feeding stuff which it represents in the percentage of protein and fat which it contains. The sample must also be accompanied by the following information, to-wit:

- (1) The number of net pounds of feeding stuff in the package to be sold or offered for sale.
- (2) The name, brand, or trade-mark under which the article is sold.
- (3) The name and address of the manufacturer or importer.
- (4) Place of manufacture.
- (5) A statement of the protein and fat which it is guaranteed to contain.

On application to the Director blank registration forms are furnished to the manufacturer, importer, or party wishing to register feed stuffs.

The above information must be either printed or stamped on the reverse side of the inspection tax tag, on the sack, or on a separate tag and attached to the sack.

The law imposes a tax of 20c per ton on all concentrated feeding stuffs, which must be paid before the tags are issued. This money is paid to the Director of the Experiment Station to be transmitted to the State Treasurer. The Director is authorized to draw on the State Treasurer for expenses incurred in the enforcement of this law.

The penalty for selling or offering for sale any concentrated feeding stuffs without the tax tag and the information required by the law, or with the statement that the feeding stuff contains substantially more protein and fat than it does contain, is a fine of not less than \$100.00 nor more than \$500.00 for the first offense, and not less than \$500.00 nor more than \$1000.00 for each subsequent offense.

Counterfeiting tax tags or using the same tag a second time may be punished by a fine of not more than \$500.00, one-half of which is paid to the informer. This fine may be increased for subsequent offenses.

The law requires the Director of the Experiment Station to make annually one or more analysis of each feeding stuff sold or offered for sale under this act, and it empowers him to take samples, which shall be drawn from not less than 5 per cent of the whole lot inspected.

The results of the analyses and additional information must be published in reports or bulletins. The law also provides that no foreign mineral substance, saw dust, dirt, or other indigestible substance, or other foreign substance, milling or manufactured offal injurious to the health of domestic animals shall be mixed with any feeding stuffs or material from which they are manufactured.

How to Meet the Requirements of the Law.

The Director of the Experiment Station has instituted a department which is designated as the "Feed Control." All correspondence relating to this subject should be addressed to Feed Control, College Station, Texas.

The feed control department has prepared certain forms and adopted regulations for carrying out the provisions of the law, which are here briefly outlined for the guidance of those interested. The following forms are used:—

(1) A "Registration Form" for use in first registering a product with the feed control department.

(2) A "Re-registration Form."

The Registration Form contains blanks for inserting the information required by the law, and a blank form of the affidavit required. When a manufacturer or importer wishes to put a feed stuff on the Texas market, he applies to the Feed Control for a "Registration form." Receiving this, he fills out the blanks, executes the affidavit, which is a part of the form, sends it to the Feed Control, and at the same time a "deposit sample" of the feed stuff. A separate registration form and separate sample is required for each particular feeding stuff to be registered. For illustration, if one wishes to register corn chops and wheat bran, apply for two registration forms. When the registration form, or forms, properly executed, and the sample of the feeding stuff (properly sealed and otherwise correct) arrive at the feed control office, the feeding stuff

concerned is registered at once. Tags may be ordered at the time these things are attended to, or as needed.

To arrive at percentage of protein and fat which he wishes to guarantee for his product, the manufacturer or importer may adopt either of the following plans, to-wit: (1) He may examine the tables in this bulletin to see how pure products similar to his usually run, and then make a guarantee that he feels he can safely maintain, or (2) he may send a fair average sample to some chemical laboratory for determination of its protein and fat content, and base his guarantee on this analysis. It is not usually safe to make a guarantee quite so high as the chemist's analysis shows, especially if such analysis runs high, since a high guarantee is difficult to maintain. The feed control makes analyses from time to time of samples taken by its inspectors from stores or from the mills, to ascertain whether the guarantees are maintained.

The "Re-registration Form" referred to is used when the manufacturer or importer wishes to re-register a feed stuff already duly registered, in order to change his guarantee. *No samples need be sent when re-registration is desired.* The only time, except when asked, that the manufacturer is ever required to send a sample is when he applies for the first or original registration, even though the same feeding stuff may be put on the market year after year.

The tax tag is simply a certificate from the Feed Control office, stating that the inspection tax has been paid. The inspection tax imposed by the law upon feeding stuffs is collected by selling these tags at such a price, each, as makes the amount of 20c per ton of feed stuff. Money for the tags should accompany the order or they will be sent C. O. D. Upon receipt of these tags the party registering the feeding stuff may, if he desires, have printed or stamped on the reverse side the information required by the law—the name of manufacturer, the place of manufacture, the content of protein and fat, etc. *The printing of this information is never done by the Feed Control office.*

Deposit samples must be sealed with sealing wax, or they will be cast aside when received, and new ones called for. To insure safe arrival it will be well to enclose jars in a strong wooden box, protected by excelsior or other material to prevent breakage. *Ship samples of feed stuffs to this office only in glass jars or bottles.*

DEFINITION OF TERMS.

Under the Texas Feeding Stuff Law all feeding stuffs must carry a guarantee of the percentage of protein and fat which they contain. A complete analysis of the feeding stuff would show, in addition to the protein and fat, crude fiber, nitrogen-free extract, ash and moisture.

Protein, being the constituent of food which forms flesh, muscle, hair, ligaments, and other portions of the animal body, is of great importance. It also replaces the wear and tear of the animal tissue and furnishes material for additional flesh. Besides furnishing material for tissue, protein may be burned in the body to produce heat, or it may serve as a source of fat in case of a deficiency in carbohydrates and fat ac-

accompanied by excess of protein. It is too costly, however, to be used as a source of heat and fat.

Fat (or ether extract) is composed mainly of fats and oils in the case of concentrated feeding stuffs, but with fodders or hays it is often composed to a considerable extent of waxes, coloring matter, and other substances. Fat is used in the animal body as a source of body fat and to furnish heat or energy. The animal requires heat to keep its body warm and energy to run the animal mechanism or to do out-side work. The beating of the heart, chewing, movements of the intestines, and the involuntary muscular movements require energy which is furnished by the oxidation of fats, carbohydrates or protein. One pound of fat is equal to 2.25 pounds of carbohydrates.

Crude fiber is the portion of the plant which resists the intense action of acids and alkalies. It consists mostly of the cell walls and woody fiber of the plant, and is the most indigestible part of the feed stuff. By means of fermentation in the intestines, crude fiber is digested to some extent in animals which chew the cud. The operation, however, consumes so much energy that a large portion of the value of the crude fiber is taken up by the process of digestion. Hays and fodders and other roughage generally contain much crude fiber, but concentrated feeding stuffs contain comparatively small quantities of it.

Nitrogen-free extract is composed of starch, sugar, dextrin and other substances of similar nature. These substances are mostly carbohydrates, that is they contain carbon, and hydrogen and oxygen in proportions to form water. Crude fiber is also composed largely of carbohydrates.

Ash is the residue left when the plant is burned. It represents mostly the mineral portion of the plant and the portion which comes from the soil, although a part of the ingredients withdrawn from the soil are volatilized during combustion. Nitrogen particularly is driven out completely. Ash is valuable to the animal, inasmuch as it furnishes the material for bones, and some constituents of it, particularly phosphoric acid and sulphur, are essential constituents of the animal cell.

Water (moisture) is always contained in feeding stuffs, but since it is furnished for the most part in liquid form, it can not be considered as having any special nutritive value.

WHAT GUARANTEES SHOW.

As already stated, the Texas Feeding Stuff Law requires a guarantee of protein and fat. It has been pointed out in the preceding paragraphs that protein and fat are not the only nutrients in feeding stuffs. We can not compare two different kinds of feeding stuffs on the basis of protein and fat alone. In order to compare two different kinds of feeding stuffs, we need a complete analysis. For example: Corn meal guaranteed to contain 9 per cent protein and 3 per cent fat, is not necessarily inferior to kaffir corn, guaranteed to contain 10 per cent protein and 3 per cent fat, and it is vastly superior to a mixture of cotton seed hulls and meal, guaranteed to contain 9 per cent protein and 3 per cent fat.

It would be better if in addition to the guarantee of protein and fat, a guarantee of the minimum amount of crude fiber were made. In the

instance just given, the amount of crude fiber in the cotton seed meal and hulls mixture would show immediately that it is inferior to the corn chops.

The guarantee of protein and fat as given at present, however, shows several things. In the first place, it shows whether or not the feed is of average quality. A cotton seed meal which is guaranteed to contain less than 42 per cent protein, in this State, is at once recognized as being below the average in quality, and the same may be said of rice bran which is guaranteed to contain less than 10 per cent protein and 6 per cent fat. In order to take advantage of the guarantee in this way, that is to form an idea of its quality from the guarantee, the purchaser should have some knowledge of the composition of feeding stuffs.

Secondly, by the comparison of the analysis with the manufacturer's guarantee, the buyer can see whether or not the feed meets the composition claimed for it. Some manufacturers make too high a guarantee and consequently can not come up to it. Other manufacturers may make an average guarantee, but sell goods inferior to their claims.

If, in addition to the determination of protein and fat, a determination of crude fiber were made, the analysis would be more likely to show whether or not the feeds are adulterated.

PURITY OF FEEDING STUFFS.

Under the present State Law the main duty of the Experiment Station is to determine whether or not feeds reach the guarantees claimed for them by the manufacturer or jobber. If the amounts of protein and fat guaranteed are furnished, and if, when adulterated, it is so marked on the package, the manufacturer has complied with the law. There is no doubt that the law should be amended to prevent certain kinds of mixtures or adulterations and to make it the duty of the Station to examine, for adulterations, suspicious feeding stuffs on the market. The addition of rice hulls, peanut shells, corn cobs, and manufacturing or milling offals to any feeding stuff should be forbidden unless the percentage of the mixture is clearly stated on the package.

The purchaser of feeding stuffs should remember that because a guarantee of protein and fat is made, it does not follow that the feeding stuff is of high grade. He should examine the guarantee carefully and from it form a judgment as to the purity and the quality of the feeding stuff.

DESCRIPTION OF CONCENTRATED FEEDING STUFFS.

Commercial feeding stuff is a term usually applied to substances which are by-products of other branches of industry. However, corn chops, milo maize chops, and kaffir corn chops are exceptions to this statement. The more important feeding stuffs on the market are as follows:

Wheat Products.—Wheat bran is the outer portion of the wheat grain, and is a valuable feed, because of its high content of protein and fat, though it contains a high per cent of crude fiber. Shorts and middlings are frequently the same in the feeding stuffs trade. They are the inner

portion of the wheat grain, made up of smaller fragments than bran and contain more of the starchy portion of the grain.

Corn Products.—Corn chops are supposed to be the entire grain of the corn chopped up. Some mills, however, put corn chops on the market which have had part of the grain removed for meal or grits. Such a product should not, of course, be sold as pure corn chops.

Corn bran is the outer husk of the corn grain. It is placed on the market in Texas as such, and in mixtures with wheat bran and corn chops.

Gluten meal is a by-product in the manufacture of starch, and is not on the Texas market.

Corn and cob meal is corn crushed with the cob that bears it. It is a good feed when well ground.

Rice Products.—Rice bran is the outer coat of the rice grain together with portions of the germ. It should be rich in protein and fat. Rice bran often comes on the market mixed with an excessive amount of hulls. The product usually contains the small amount of hulls incident to the process of manufacture, but some mills mix in an excessive amount of hulls. If the minimum guarantee of crude fiber were made it would aid in detecting these mixtures.

Rice polish is a finely powdered substance obtained in polishing rice grain. It is richer in starch than rice bran.

Rice hulls are the outer coverings of the rice grain. They contain much crude fiber and are poor in protein and fat.

Cotton Seed Products.—Cotton seed meal is the ground residue from the extraction of oil from cotton seed kernels. Texas cotton seed meal is, on the average, richer in protein than meal from other States. In this State it should contain not less than 44 per cent protein, except in some parts of East Texas a lower guarantee of protein must be made.

Cracked cake corresponds to cotton seed meal, or the pressed cake is cracked instead of ground.

Milo Maize and Kaffir.—Milo maize chops is the chops from the milo maize grain. Milo maize in the head is prepared from the grain which has not been removed from the heads. It has more crude fiber and is poorer in protein and fat than the chops from the pure grain, and therefore has a lower feeding value.

Kaffir corn chops and kaffir corn in the head correspond to the foregoing, kaffir corn being used instead of milo maize.

Miscellaneous Feeds.—A number of mixed feeds, of varying composition, are on the market. Some of them are mixtures composed of corn and wheat bran, and others are mixtures of other grain products. The purchaser of such feeds should examine them carefully in order to satisfy himself, if possible, what ingredients they contain.

COMPOSITION OF FEEDING STUFFS.

In the following table we give the average analysis of a number of feeding stuffs sold in Texas. This table is based upon the analyses made in different parts of the country. A complete analysis of this kind is of value in different ways.

First, by comparing the guaranteed percentages of protein and fat in a given feeding stuff with the average composition as given in the following table, one can decide whether or not a feeding stuff is guaranteed to be of average value. A higher guarantee in protein and fat than the average is a claim of higher than the average value. One must remember, however, that in order to give a safe guarantee, it is necessary for the manufacturer to guarantee slightly below the average. This allows for unavoidable variations in the composition of feeding stuffs.

Second, comparison of the composition with the selling price of feeding stuffs of different kinds, aids one in determining which is the most economical feed to buy at any given time. Often the prices of feeding stuffs have little relation to their feeding value.

Third, the table will aid in the calculation of rations for farm animals. A discussion, however, of how this is done is beyond the limits of this Bulletin.

A study of the chemical composition of Texas feeding stuffs is under way and will be published in Bulletin form when completed.

TABLE I.—COMPOSITION OF SOME FEEDING STUFFS—POUNDS PER HUNDRED.

	Water	Fat	Protein	Crude fiber	Nitrogen feed extract	Ash
Wheat bran	11.9	4.0	15.4	9.0	53.9	5.8
Wheat middlings	12.1	4.0	15.6	4.6	60.4	3.3
Wheat shorts	11.8	4.5	14.9	7.4	56.8	4.6
Corn chops	10.9	5.4	10.5	2.1	69.6	1.5
Corn bran	8.7	6.2	9.8	11.2	62.6	1.5
Corn and cob meal.....	15.1	3.5	8.5	6.6	34.8	1.5
Corn cob	10.7	0.5	2.4	30.1	54.9	1.4
Cotton seed meal.....	8.52	13.45	43.26	5.44	22.31	7.02
Cotton seed hulls.....	11.1	2.2	4.2	46.30	33.4	2.8
Rice bran	9.8	10.5	11.9	12.2	45.8	10.0
Rice polish	10.81	7.0	11.9	3.3	62.2	4.9
Rice hulls	8.62	1.12	3.07	36.17	34.16	15.38
Kaffir corn	12.5	2.9	10.9	1.9	70.5	1.3
Milo maize	9.1	3.2	11.2	2.2	72.6	1.7
Oats	11.0	5.0	11.8	9.5	59.7	3.0
Wheat	10.5	2.1	11.9	1.8	71.9	1.8
Rice	12.4	0.4	7.4	0.2	79.2	0.4
Cotton seed	9.1	20.1	19.6	18.9	28.3	4.0

WHAT GUARANTEES MAY BE MADE.

The following table based on this year's control work, and on other analyses, shows what guarantees may be made for pure products. A lower guarantee indicates inferior quality; a higher guarantee, a claim of higher quality.

TABLE II.—GUARANTEES FOR PURE FEED PRODUCTS.

	Per cent protein	Per cent fat
Corn chops	9.00	3.00
Wheat bran	14.00	4.00
Wheat shorts	15.00	3.00
Wheat chops	14.00	2.00
Cotton seed meal*	44.00	8.00
Cotton seed cake*	44.00	8.00
Rice bran	10.00	6.00
Rice polish	10.00	6.00
Rice hulls	2.00	0.5
Milo maize	9.5	2.5
Kaffir corn	9.5	2.5
Corn bran	8.5	4.00
Corn and cob meal	8.00	2.5

*In East Texas a lower guarantee may be made.

AVERAGE COMPOSITION OF SAMPLES ANALYZED.

Table III gives the number and average composition of samples subjected to analysis this season. 1626 samples are tabulated. This is not the entire number of samples collected or subjected to analysis but in order to avoid delay in the production of the Bulletin this number only is published.

TABLE III.—SHOWING AVERAGE CONTENT OF PROTEIN AND FAT IN GIVEN NUMBER OF SAMPLES ANALYZED.

Number of Samples		Guaranteed Analysis		Chemists' Analysis	
		Protein Per cent	Fat Per cent	Protein Per cent	Fat Per cent
475	Corn chops	9.01	3.74	9.30	4.10
488	Wheat bran	15.26	4.37	14.75	4.42
97	Wheat shorts	15.21	4.34	16.90	4.28
13	Wheat chops	10.94	3.68	16.01	2.52
321	Cotton seed meal.....	42.76	8.58	47.03	9.69
71	Cotton seed cake.....	43.09	8.69	48.24	9.06
1	Cotton seed scrum.....	35.00	5.00	37.75	5.70
4	Caddo feed (cold process cotton seed meal and hulls)	16.00	5.25	21.24	8.09
54	Mixed feed				
10	Rice bran	10.38	8.34	10.91	9.96
15	Rice polish	11.41	7.90	11.57	7.04
6	Rice hulls	2.59	1.44	2.71	0.80
4	Chicken feed (cracked rice).....	5.47	2.27	8.64	2.24
10	Milo maize	8.36	2.67	10.99	2.78
13	Kafir corn	8.70	3.12	10.57	3.07

1626

DISCUSSION OF FEED CONTROL ANALYSES.

Owing to the lack of knowledge on the part of many manufacturers and dealers as to the nature of protein and fat in feeding stuffs, and the composition of feeding stuffs, it was to be expected that the results of the first year's operation of the feed law would be largely educational. It was to be expected that many guarantees would be made which were higher than could be maintained, or in some cases, even reached, and also that some guarantees would be considerably lower than should be made for pure feed stuffs.

It will be noted that a number of the analyses are below the guarantee. For example: One mill makes a guarantee of 13.2 per cent protein and 5.27 per cent fat in corn chops. This is a very high guarantee; we have not found any sample of corn chops to contain more than 11 per cent of protein. There are a number of guarantees of 10 per cent protein or more in corn chops. Corn chops usually run about 9 per cent protein, so that it is not to be expected that a guarantee of 10 per cent could be maintained.

On the whole, we believe that the feeders of Texas are to be congratulated on the high grade of the feeding stuffs on the market. There have, of course, been cases in which inferior or adulterated feeding stuffs were sold, but for the most part the feeding stuffs have been of excellent quality.

Cotton Seed Meal.—Cotton seed meal is graded as follows:

Choice. Must be the product from choice cotton seed cake when finely ground, must be perfectly sound, sweet, and light yellow color (canary), free from excess of lint and hulls. By analysis must contain at least 8 per cent of ammonia, or 41.13 per cent protein.

Prime. Must be made from prime cake, finely ground, sweet odor, reasonably bright in color, yellow, not brown or reddish, and free from excess of lint or hulls, and by analysis must contain at least 8 per cent of ammonia, or 41.13 per cent of protein.

Off. Any cottonseed meal which is distinctly deficient in any of the requirements of prime quality, either in color, odor, texture, analysis, or all is classed as "Off."

Cottonseed meal should, in Texas, carry a guarantee, in most cases, of at least 44 per cent protein and 7 or 8 per cent fat. A guarantee of 9 per cent fat will not be maintained in many cases. There are some cases in East Texas where a lower guarantee than 44 per cent is necessary, as the meal in this section runs lower than the meal from other parts of the State. Any meal containing less than 41.12 per cent protein is below prime according to the rules of the Cottonseed Crushers Association. The tables of analysis contain six samples of meal which run below this figure. Whether all these meals are made from a naturally low grade of seed, or are adulterated with hulls, can not be decided in absence of crude fiber determinations.

A number of mills make a very low guarantee of protein, ranging from 32.67 per cent up. When the consumers are educated to a knowledge of what *the guarantee* means, the producers will make a guarantee as high as their meal can carry.

In one case at least the low per cent of protein contained in a sample is due to an excessive amount of fat (22 per cent) left in the meal.

It is seen from the table that Texas meal is rich in protein.

Corn Chops.—As in the case of cottonseed meal, a number of samples fall below the guarantee on account of too high a guarantee. A guarantee of 10 per cent protein and 4.5 per cent fat is very difficult to maintain, yet we have one guarantee of 12.69 per cent protein and 5.94 per cent fat, figures which our analyses have never reached.

The number of samples which fall below the guarantee on account of inferior quality is small. Pure corn chops should come up to a guarantee of 9 per cent protein and 3 per cent fat.

Wheat Bran.—Wheat bran should come up to a guarantee of 14 per cent protein and 4 per cent fat; some mills are able to maintain higher guarantees. As in the case of cottonseed meal and corn chops, many samples fall below the guarantee on account of too high guarantees, and only two or three fall below on account of being of inferior quality.

Rice Bran.—Rice Bran should come up to a guarantee of 10 per cent protein and 6 per cent fat, and often, if desired, a higher guarantee

could be maintained. Attention should be called to two samples of rice bran containing 6.69 per cent and 5.39 per cent protein and 3.15 per cent and 3.65 per cent fat, respectively. These samples must be considered as of inferior quality and are doubtless adulterated with rice hulls.

Miscellaneous Feeds.—Corn bran appears to vary considerably in composition, being sometimes equal to corn chops in protein and high in fat, and at other times very low in protein and fat.

Attention should be called to two oat feeds listed in the tables, which contain 5.93 per cent and 6.65 per cent protein and 2.43 per cent and 2.64 per cent fat, respectively. These feeds are probably composed largely of oat hulls or other waste material. They are but little richer in protein and fat than cottonseed hulls.

Attention should be called to a hog feed containing 4.37 per cent protein and 0.72 per cent fat, which is a little better in this respect than rice hulls.

COPY OF LAW REGULATING SALE OF MIXED FEED IN THE STATE OF TEXAS.

EFFECTIVE JULY 14, 1905.

An Act regulating the sale of concentrated commercial feeding stuffs, and the materials from which they are manufactured, defining concentrated feeding stuffs, prohibiting their adulteration, providing for their correct weighing and marking, and providing for the collection of samples, the expenses of the enforcement of the law, and fixing penalties for its violation.

Be it enacted by the Legislature of the State of Texas:

SECTION 1. Every lot or parcel of concentrated feeding stuffs, as defined in Section 3 of this Act, used for feeding farm live stock, sold, offered or exposed for sale in the State of Texas, for use within this State, shall, in addition to the tag described in Section 5 of this Act, have affixed thereto in a conspicuous place on the outside thereof a plainly printed statement clearly and truly certifying the number of net pounds of feeding stuff in the package, the name, brand or trademark under which the article is sold, the name and address of the manufacturer or importer, the place of manufacture, and a chemical analysis stating the percentages it contains of crude protein, allowing one per cent of nitrogen to equal six and one-fourth per cent of protein and of crude fat, both constituents to be determined by the methods adopted at the time by the Association of Official Agricultural Chemists of the United States. Mill products hereinafter mentioned shall have the following standard weights, viz: flour, one hundred and ninety-six (196) pounds per barrel, or forty-eight (48) pounds per sack; corn meal, bolted or unbolted, thirty-five (35) pounds per sack; cottonseed meal, one hundred pounds per sack; cereals of any kind, whether pure, mixed or adulterated, one hundred (100) pounds per sack. Fractional barrels and sacks shall weigh in the same proportion, and these weights shall be exclusive of the barrel in which the product is packed.

SECTION 2. The term concentrated commercial feeding stuffs, as

herein used, shall not include hay and straw, the whole seed or grains of wheat, barley, rye, oats, Indian corn, rice, buckwheat or broomcorn, or any other whole or unground grains or seeds.

SECTION 3. The term concentrated feed stuffs, as herein used, shall include wheat bran, wheat shorts, linseed meals, cottonseed meals, pea meals, cocoanut meals, gluten meals, gluten feeds, maize feeds, starch feeds, sugar feeds, dried brewer's grains, malt sprouts, hominy feeds, cerealine feeds, rice meals, rice bran, rice polish, rice hulls, oat feeds, corn and oat chops, corn chops, ground beef, or mixed fish feeds, and all other materials of similar nature not included in Section 3 of this Act.

SECTION 4. Before any concentrated feeding stuff, as defined in Section 3 of this Act, is so offered or exposed for sale, the importer, manufacturer and party who causes it to be sold or offered for sale within the State of Texas for use within this State, shall for each and every feed stuff bearing a distinguishing name and trademark, file with the director of the Texas Agricultural Experiment Station a certified copy of the statement named in Section 1 of this Act, and shall also deposit with said director a sealed glass jar or bottle containing not less than one pound of the feeding stuff to be sold or offered for sale, accompanied by an affidavit that it is a fair average sample thereof and corresponds within reasonable limits to the feeding stuff which it represents in the percentage of protein and fat which it contains.

SECTION 5. The manufacturer, importer, agent or seller of each concentrated commercial feeding stuff, as defined in Section 3 of this Act shall, before the article is offered for sale, pay to the director of the Texas Agricultural Experiment Station an inspection tax of twenty cents per ton for each ton of such concentrated feeding stuff sold or offered for sale in the State of Texas for use within this State, and shall affix to each lot shipped in bulk, and to each bag, barrel or other package of such concentrated feed stuffs a tag to be furnished by said director stating that all charges specified in said section have been paid. The director of said Texas Agricultural Experiment Station is hereby empowered to prescribe the form of such tags and adopt such regulations as may be necessary for the enforcement of this law. Whenever the manufacturer or importer or shipper of a concentrated feeding stuff shall have filed the statement made in Section 1 of this Act and have paid the inspection tax, no agent or seller of said manufacturer, inspector or shipper shall be required to file such statement or pay such tax. The amount of the inspection tax and penalties received by said director shall be paid into the State Treasurer. So much of the inspection tax and penalties collected under this Act shall be paid by the State Treasurer to the Treasurer of the Texas Agricultural and Mechanical College, as the director of the Texas Agricultural Experiment Station may show by his bills has been expended in performing the duties required by this Act, but in no case to exceed the amount of the inspection tax and penalties received by the State Treasurer under this Act.

SECTION 6. Any manufacturer, importer, agent or person selling, offering or exposing for sale any concentrated commercial feeding stuff as defined in Section 3 of this Act, without the statement required by Section 1 and the tax tag required by Section 5 of this Act, or with a label

stating that said feeding stuffs contain substantially a larger percentage of either of the constituents mentioned in Section 1 of this Act is contained therein, shall, on conviction in a court of competent jurisdiction, be fined not less than one hundred dollars nor more than five hundred dollars for the first offense, and not less than five hundred dollars nor more than one thousand dollars for each subsequent offense. The sale or offering for sale of each package shall constitute a separate offense.

SECTION 7. Any person who shall counterfeit or use a counterfeit of the tag or tags prescribed by this Act, knowing the same to be counterfeited, or who shall use them a second time after the said tags shall have once been attached shall be guilty of a misdemeanor, and on conviction thereof, shall be fined in a sum not exceeding five hundred (\$500) dollars, one-half of which shall be paid to the informer; which fine may be doubled or tripled at each second or third conviction, and so on progressively for subsequent convictions.

SECTION 8. All manufacturers and importers of concentrated commercial feeding stuffs, or dealers in same, shall, when requested, furnish the director of the Texas Experiment Station with a complete list of names or trademarks of such feeding stuffs.

SECTION 9. The director of the Texas Agricultural Experiment Station shall cause one analysis or more to be made annually of each concentrated commercial feeding stuff sold or offered for sale under the provisions of this Act. Said director is hereby authorized in person or by deputy to take a sample not exceeding two pounds in weight for analysis from any lot or package of concentrated commercial feeding stuff which may be in the possession of any manufacturer, importer, agent, dealer or buyer in this State; but said sample shall be drawn or taken in the presence of said party or parties in interest or their representative, and shall be taken from a parcel, lot or number of parcels which shall not be less than five per cent of the whole lot inspected, and shall be thoroughly mixed and divided into two samples and placed in glass or metal vessels carefully sealed and a label placed on each stating the name or brand of the feeding stuff or material sampled, the name of the party from whose stock the sample is drawn, and the date and place of taking such sample, and said label shall be signed by the director or his deputy and the party or parties at interest, or their representatives present at the taking and sealing of said sample; provided, that where the party or parties at interest refuse to be present and take part in the sampling of said feed stuffs, the director or his deputies may take said samples in the presence of two disinterested witnesses, one of said duplicate samples shall be retained by the director and the other shall be left with the party whose stock was sampled, and the sample or samples retained by the director shall be for comparison with the certified statements made in Section 1 and 4 of this Act. The result of the analysis of the sample or samples so prescribed, together with such additional information as circumstances advise, shall be published in reports or bulletins by the Texas Agricultural and Mechanical College from time to time.

SECTION 10. The term importer for all the purposes of this Act shall be taken to mean all such persons as shall bring into or offer for sale

within this State concentrated commercial feeding stuffs manufactured without this State.

SECTION 11. No foreign mineral substance, saw-dust, dirt or other indigestible substance or other foreign mineral or substance, milling or manufactured offal, injurious to the health of domestic animals, shall be mixed with any feeding stuffs or any material or materials from which they are manufactured, sold or offered or exposed for sale in the State.

Every person violating Section 11 of this Act shall, upon conviction thereof, be punished by a fine of not less than one hundred nor more than five hundred dollars, or by imprisonment in the county jail for a term of not less than thirty days and not more than sixty days, or by both such fine and imprisonment.

SECTION 12. (This Act becomes effective July 14.)

H. B. No. 410.*

COPY OF LAW REGULATING MARKETING, WEIGHT AND ADULTERATION OF FEEDS IN STATE OF TEXAS.

EFFECTIVE JULY 14, 1905.

An Act to regulate the Sale of Certain Mill Products, and Provide Penalties for Violation Thereof:

SECTION 1. *Be it enacted by the Legislature of the State of Texas:* Mill products hereinafter mentioned shall have the following standard weights, viz: flour, one hundred and ninety-six pounds per barrel, or forty-eight pounds per sack; corn meal, bolted or unbolted, thirty-five pounds per sack, and feed made from cereals of any kind, whether pure, mixed, or adulterated, one hundred pounds per sack. Fractional sacks and barrels shall weigh in the same proportion and these weights shall be net and exclusive of the barrel or sack in which said product is packed.

SECTION 2. The correct name and the true net weight of the contents of each and every hogshead, barrel, box, cask, bale, sack or package of any of the foregoing products, whether sold in single packages or lots, shall be plainly marked, branded or stenciled in large letters and figures not less than two inches in size upon the exterior of such hogshead, barrel, box, cask, bale, sack or package in a conspicuous place, as the head in case of hogsheads, or barrels, or the front or branded side in case of sacks, bales or packages; and it shall be unlawful for any person, firm or corporation, or the agent, employe or representative of any person, firm or corporation, to sell or exchange or offer for sale or exchange any of such products so packed or contained until the provisions hereof have been complied with.

SECTION 3. It shall be unlawful for any person, firm or corporation, or the agent, employe or representative of any person, firm or corporation,

* Director of Experiment Station not given supervision of this Act.

to sell or exchange, or offer for sale or exchange, whether in single packages or lots, any product composed of mixed cereals of any kind or any cereals adulterated in any manner, unless the word "*adulterated*" is plainly marked, printed or stenciled diagonally across the other marks or brands, if any, on the hogshead, barrel, cask, box, bale, sack or package containing the same, or in case there are no other marks thereon, then across such box, barrel, hogshead, cask, bale, sack or package, in a conspicuous place in large letters and figures not less than two inches in size.

SECTION 4. If any person shall knowingly violate the provisions of this Act, he shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be fined in any sum not less than twenty-five dollars nor more than one thousand dollars, and each transaction shall be deemed a separate offense.

SECTION 5. All laws and parts of laws in conflict with the provisions of this Act are hereby repealed.

SECTION 6. (Emergency Clause).

(Although the bill contained the usual emergency clause it does not become effective until July 14th, as the House did not pass it by a two-thirds aye and nay vote).
